

Congressman John Fleming (Louisiana physician) has proposed an amendment that would require congressmen and senators to take the same healthcare plan they force on us (**under proposed legislation they are curiously exempt**). Congressman Fleming is encouraging people to go on his Website and sign his petition (very simple - just first, last and email).

I have immediately done just that at: <http://fleming.house.gov/> Please urge as many people as you can to do the same!

**If Congress forces this on the American people, the Congressmen should have to accept the same level of health care for themselves and their families.**
